Email Address: _____

How many bathrooms do you currently have in your home?	
Will this be a new or remodeled bathroom in your home?	
How many people live in your home?	
Who will be using this bathroom?	
What is your preferred remodeling budget/range for this space?	
How long do you plan to live in this home?	

Getting Started – General Questions

- Just write a couple sentences for each question.
 - Write down your first impressions.
 - The next page will delve into more specific choices.
 - If you get stuck, don't panic.
 - Your designer will help you pull your design together.
1. Write down what you like and don't like about your current bathroom.
I like...

I don't like.....

2. Gather ideas from books, magazines and/or websites. Bring these pictures to your design meeting.

3. Start thinking about what type of fixtures and vanity cabinetry you want. Do you want painted or stained? Chrome or brushed nickel? Tile or vinyl flooring?

4. Do you think you want a stone, cultured marble, Swanstone, or laminate vanity top? We can help you learn the advantages of each type of countertop.

5. Gather rough dimensions of the bathroom. What size tub or shower do you want – small, medium or large?

6. In addition to the questions above, write down your “must haves.” Is a whirlpool tub a must? How about extra privacy?

Design choices

✓ **Check areas that do and do not work for you in your current bathroom**

Storage	Start From Scratch	Needs Improvement	Works Fine	
Vanity cabinet				
Towel bars				
Linen closet				
Drawers
